Please do consider rejecting the NAB's petition 04-160. As a new customer of XM Satellite Radio I have come to depend upon the immediately available traffic and weather that I can receive without commercials and at any location. I am paying for this service and do not feel that it should be curtailed. Just this past Memorial Day my husband and I traveled through a very mountainous area of PA. Last time all we got was static but this time we had entertaining, useful and timely information available the whole trip.
